JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*Emigrants recommended for rejection.*

Number of emigrants per steamship *China* recommended, January 22, 1907, for rejection: For San Francisco, 9. All rejections were for trachoma.

## CUBA.

*Report from Cardenas—No contagious diseases.*

Consular Agent Van Tine reports, February 11, as follows: No contagious diseases reported in this city for the week ended February 9, 1907.

*Report from Santiago—Inspection of vessels.*

Acting Assistant Surgeon Wilson reports, February 12, as follows: Week ended February 9, 1907. Bills of health issued to 5 vessels bound for the United States. No vessel fumigated. No quarantinable disease reported.

## GREAT BRITAIN.

*Report from Glasgow—Cerebro-spinal meningitis.*

Consul Austin forwards the following information under date of February 4:

During the month of January, 1907, 52 deaths from cerebro-spinal meningitis were reported.

## HAWAII.

*Report from Honolulu—Plague death on steamship America Maru from oriental ports.*

Passed Assistant Surgeon Ramus, in temporary charge, reports, February 11, as follows:

The steamship *America Maru* from the Orient, arrived January 29, having had 1 death at sea among the crew. As the case had some suspicious features, the body was taken to the quarantine station, and post-mortem and microscopical examinations were made. A provisional diagnosis of plague was made, and the vessel and personnel were subjected to the usual quarantine measures. Culture tubes inoculated from liver, spleen, and lung developed growths of typical bipolar bacilli. A guinea pig was inoculated from one of the cultures, and died 3 days later from plague. Smears and cultures from the pig's tissues showed pure cultures of the same bipolar bacilli.

## INDIA.

*Reports from Calcutta—Transactions of Service—Cholera, plague, and smallpox.*

Acting Assistant Surgeon Eakins reports, January 24 and February 1, as follows:

Week ended January 19, 1907. Bill of health issued to the steamship *Neidenfels* bound for Boston and New York with a total crew of 63. The usual precautions were taken, holds fumigated, rat guards on wharf lines, and Lascars's effects disinfected.
